BE IT RESOLVED: at the recommendation of the Fire Commissioners Assistant Fire Marshal Douglas Pynes salary is hereby increased to \$20.00/hr

RESOLUTION 2015 - 82 ~PROPOSED LOCAL LAW “B” OF 2015

PLEASE TAKE NOTICE: that a Public Hearing of the Village Board of Trustees will be held at the Village Hall, 224 Main Street, Northport, New York at 6:00 o'clock in the evening of the 5th day of May, 2015, to consider the following proposed local law:

PROPOSED LOCAL LAW “B” OF 2015
A LOCAL LAW TO AMEND
CHAPTER 106 BUILDING CONSTRUCTION
ARTICLE III
OF THE CODE OF THE VILLAGE OF NORTHPORT

EXPEDITING INSTALLATION OF SOLAR ENERGY PANELS

Section 106-27: Legislative Intent

A. It is the intention of the Northport Village Board as part of its goal to limit America’s dependence on imported sources of fossil energy, cut green house gas emissions and reduce the cost of energy for our residents to enact the Unified Solar Permit Process. It is important to establish a process which establishes a standardized permit for use by all New York Municipalities that simplifies and streamlines the permitting of small scale photovoltaic systems and fast tracks the permit process. The fast track process is modelled on the guideline recommendations of the Long Island Unified Solar Permitting Initiative, whereby the installation of standard solar energy systems can be standardized, simplified and accelerated in towns and villages across Long Island.

Section 106-28. Applications and Permit

A. All building permit applications for installation of photovoltaic systems on residential and non-residential buildings shall be expedited by the Northport Village Building Department. Applications for standard installations on residential and non-residential property shall be determined within fourteen (14) business days of the filing of a completed application. If the application is incomplete or deficient it shall be returned to the applicant within seven (7) days of receipt by the Village of Northport Building Department.

B. For the purpose of this Article the term standard installation shall mean those installations that meet the following criteria and any subsequent amendment thereto:

- (1) Are not subject to architectural review;

- (2) Are proposed for installation on a roof with a single layer of roof covering;
- (3) Are to be flush-mounted parallel to the roof surface and no more than six (6) inches above the surface;
- (4) Have an eighteen (18) inch clearing at one side of the roof ridge and an eighteen (18) inch clearing path to the ridge;
- (5) Add a gravity roof load of no more than five (5) pounds per square foot for photovoltaic (PV) and six (6) pounds per square foot for residential solar hot water (RSHW);
- (6) Be installed by contractors which are on LIPA's pre-screened solar contractor list;
- (7) Use PV panels that have been certified by a nationally-recognized testing laboratory as meeting the requirements of the Underwriters Laboratory (UL) Standard 1703 and inverters must be on a list of New York State Public Service Commission type tested inverters which are tested by UL or other nationally recognized laboratories to conform with UL 1741;
- (8) Use RSHW equipment that has been certified by the Solar Rating and Certification Corporation under its OG-100 standard for solar collectors;
- (9) Use other equipment such as modules, combiner boxes and a mounting system that have been approved for public use; and
- (10) Be in full compliance with all current National Electrical Code (NEC) requirements.

C. The application for the installation of photovoltaic system shall be in substantial conformity with the requirements of the Long Island Unified Solar Permit Initiative and its solar energy fast track permit application.

Section 106-29 Waiver of Fees

A. All building permit application fees for small scale photovoltaic systems on residential and non-residential structures shall be waived, provided the installation has not been commenced or completed before a permit has been applied for or issued.

Section 106-30 Issuance of Certificate of Completion

A. Prior to the issuance of a certificate of completion or compliance, a sign (or decal) shall be affixed by the property owner to the utility meter and at any alternating current (AC) disconnect switch indicating the existence of an operating solar electric co-generation system on site.

Effective date of this local law shall take effect upon filing with the Secretary

RESOLUTION 2015 - 83 ~PROPOSED LOCAL LAW “C” OF 2015

PLEASE TAKE NOTICE: that a Public Hearing of the Village Board of Trustees will be held at the Village Hall, 224 Main Street, Northport, New York at 6:00 o'clock in the evening of the 5th day of May, 2015, to consider the following proposed local law:

PROPOSED LOCAL LAW “C” OF 2015
A LOCAL LAW TO AMEND
CHAPTER 306: ZONING
OF THE CODE OF THE VILLAGE OF NORTHPORT

Section 306-47 ELECTRIC VEHICLE CHARGING SYSTEMS

Section 306-47.1 Definitions

ELECTRIC VEHICLE CHARGING STATION

A system for the charging of an electric vehicle. Components typically include a charging kiosk and transformer.

ELECTRIC VEHICLE CHARGING

The use of an electric vehicle charging station by which electric vehicles are fuelled through the transfer of electricity into the vehicle battery.

Section 306-47.2 Permit Required.

A. No person shall install an electric vehicle charging station within the Village of Northport without a permit issued from the Building Department. Charging Station permits shall become invalid unless the authorized installation is completed within six months of the date of the submitted application. Upon completion of the installation, the permittee must contact the Building Department, and arrange for an inspection of the charging station to ensure compliance with all federal, state and local laws.

B. It is the intention of the Northport Village Board to encourage and streamline the permit process with regard to electric vehicle charging station permits. To that effect the application shall consist of the following requirements:

1. All installations must comply with National Electrical Code, NFPA 70;
2. all installations must comply with the New York State Building Code, New York Residential Code, New York State Fire Code and New York State Plumbing Code;
3. any person installing a charging station shall, prior to installation, notify the utility providing electric power to the property;
4. each electric vehicle charging station shall include vehicle impact protection (bollards) or a similar structure;
5. components for electric vehicle charging station shall adhere to all of the

- setback requirements of the Village Code of the Village of Northport;
5. No more than one charging station may be installed on ant parcel of property;
 6. Notwithstanding any district or zoning regulation in the Village of Northport, electric vehicle charging station shall be a permitted accessory use in all zoning districts.

Section 106-29 Waiver of Fees

A. All permit application fees for the charging station shall be waived, provided the installation has not been commenced or completed before a permit has been applied for or issued.

Effective date of this local law shall take effect upon filing with the Secretary of State.

RESOLUTION 2015 –84 ~ BUDGET TRANSFER

BE IT RESOLVED: The Village Treasurer is hereby authorized to make the following budget transfers; see Schedule “A”

The next regular meeting of the Board of Trustees will be on May 5th, 2015 at 6:00 P.M

A RESOLUTION FOR AN EXECUTIVE SESSION: if necessary, for personnel and/or litigation matters.

Respectfully submitted,

Donna M. Koch
Village Clerk
